INFLATABLE SCREENS AND PROJECTION EQUIPMENT

HandiTheatre® System

A unique and portable inflatable big screen system that fits your professional needs

The HandiTheatre® Pro gives you the flexibility you require and the quality you expect; this compact system features a theatrical grade projector that delivers a bright and vivid image; while the system's high performance speakers with built-in subwoofer delivers crisp, bold and balanced audio that triumphs over audience noise and other distractions.

This is the ideal system for the professional on the go with electronic equipment being housed in protective

road cases for easy transportation and storage.

Use at training seminars, outdoor events, demonstrations, outreach exploits, festivals, community events and more to satisfy small to medium sized audiences of up to 350 people.

Sealed Screen - No need for constant air flow!

Compatible with use in both indoors and outdoors applications.

Choose Your Screen

Touring® Series

Ideal for drive-ins, festivals and large community events in parks and designated entertainment arenas

Ideal for drive-ins, festivals and large community events in parks and designated entertainment arenas. The Touring® Screen Series is our largest screen solution offering flexible viewing solutions to accommodate up to 3000 people with three different screen sized options available. Screen inflates in approximately 2 minutes and features a built-in solid PVC frame with theatrical grade quality front projection surface and optional rear projection surface.

System includes the SmartBox® Platinum, which is a pre-wired portable multimedia control device allowing for plug and play connectivity, minimising setup time and reducing the need for on-the-show fault finding. Attachable front and back casings fully enclose for easy transport, storage and easy set up for operation.

Modern outdoor cinema screen accommodates large audiences and is designed for commercial or industrial use.

SmartBox® Platinum

Touring® Series Features

- SmartBox® Platinum (pre-wired portable multimedia control device)
- Quiet inflation blowers for constant air pressure
- Stitched screen seams for greater strength
- Optional rear projection surface
- Bungee cord fasteners for increased image stability
- System comes complete with everything needed to setup your screen system including tethers and carabiners

SCREEN OPTIONS

8 metres - up to 1200 people

10 metres - up to 2000 people

12 metres - up to 3000 people

SmartFold® Series

A foldable on-the-go projection system for indoor use

The SmartFold® is designed to be used when space is limited at training events, seminars, expos, meetings, presentations and corporate gatherings. Each system includes a front and rear projection screen surface, an HD digital short throw projector, professional grade speakers, durable and lightweight construction and wheeled travel transport case.

The SmartFold® Series is one of a kind projection system that contains everything you need to use your system for presentations, movies, games etc

Screen options will accommodate between 100 to 350 people.

Screen features durable, lightweight Aluminum frame.

Plug and play connectivity makes laptop presentations easy to display.

Includes a SmartBox® Gold that makes setup easy and fast.

SmartFold® System Features

- Easy setup
- Screen surface attaches to frame with press studs
- 12 month warranty
- Easily assembled by one person
- Height adjustable legs
- Plug and play technology

A SmartFold screen is shown on a stand, displaying a vibrant image of a colorful parrot in flight. Two small speakers are positioned on stands to the left and right of the screen. A central subwoofer is located on the floor in front of the screen.

SCREEN OPTIONS

- 120" - up to 100 people
- 150" - up to 150 people
- 180" - up to 250 people
- 200" - up to 350 people

SmartBox® Gold, Platinum

The SmartBox® Gold and SmartBox® Platinum are our exclusive portable multimedia control device that can be integrated into various audio visual elements including projectors, speakers, MP3 players, laptops and video cameras minimising setup time and reducing the need for on-the-show fault finding

Both models are pre-wired and have attachable front and back casings to become fully enclosed for easy transportation, storage and easy setup for operation. As well as an inbuilt Sony or equivalent Blu-Ray/DVD player, HDMI Switcher and professional Rolls Audio Mixer.

Features of the SmartBox® Gold:

- Screen Blu-Ray/DVD movies
- Cue up various inputs (Blu-Ray Player, Set Top Box, Aux HDMI input) before sending them to the projector
- Control the volume for all the devices attached to your SmartBox® system
- A plug-in microphone for announcements
- HDMI and MP3 Auxiliary input connections
- Watch live TV with an external Set Top Box
- Play music from USB or external MP3 player
- Play video games through an external games console!

SmartBox® Gold

Features of the SmartBox® Platinum:

- Screen Blu-Ray/DVD movies
- Built-in Set Top Box to watch live TV
- 5" preview monitor with mini-jack headphone monitoring to have complete confidence before it goes on the big screen
- A plug-in and wireless microphone
- Cue up various inputs (Blu-Ray player, Set Top Box, Aux HDMI input) before sending them to the projector with the HDMI Switcher
- Control the volume for all the devices attached to your SmartBox® system
- Play music from CD's, USB or external MP3 player
- Play video games through an external games console!
- Used in installations to play the same movie on two different screens at one time

SmartBox® Platinum

Road cases

VAST System

For live TV anywhere, the VAST Set Top Box allows people in remote locations of Australia to access up to 15 free to air channels with the device, allowing audiences to watch TV programmes or sports games on the big screen.

The Vast Set Top Box System is also perfect for people who currently rely on analogue services, or who have issues because of local interference or are located far away from the local transmitter.

Short Throw projection

Short Throw Projectors are great if you are limited in space, as they are designed to shorten the distance between the projector and the screen. The advantage if space is limited is that a larger image can be produced with the projector sitting closer than normal to the screen.

An added bonus of the Short Throw Projector sitting closer to the screen, is that it helps to give a brighter quality image as it cuts out much more ambient light than a standard projector.

Ideal for use in conference rooms, expos and tradeshow stands, home theatres (indoors and outdoors), in situations where your screen system will be setup in various locations with varying circumstances or backyards that are restricted.

Accessories

Below is a selection of accessories that might be of interest. For the full range please visit our website

15m HDMI

Complies with HDMI specifications and can connect to HDTV Set Top Boxes, Foxtel units, Blu-Ray/DVD players, and switcher or splitter
