

HandiTheatre®
JUST HIT PLAY

HandiTheatre Light SETUP MANUAL

Set Up The Screen

1. Take the screen frame out of the bag.
2. Assemble three poles by button click
3. Lay poles on the ground according to numbers (a, b)
4. connect top corners to the longer top pole
5. slide the shorter side poles into the screen surface from the bottom to the top (c)
6. connect side poles to the corner pieces
7. pull the screen up to the top and drag the top edge over the top pole. Connect the zipper, seal the top of the screen (d)
8. Connect the feet by clicking them into the side poles (e)
9. Stand the screen up and straiten the screen surface (f)
10. Use stakes to hold your screen stable on the ground, when using the screen outdoors on soft surfaces (g)

Set Up The Projector

1. Put the projector on a small table approx 3.7metres away for the screen. The table should be approx. 70cm high.
2. Connect the projector to the power (do not turn on)
3. Connect one end of the HDMI cable to your projector and the other end into your source (this can be the DVD player, game console or laptop / PC)

Plug In The Soundbar

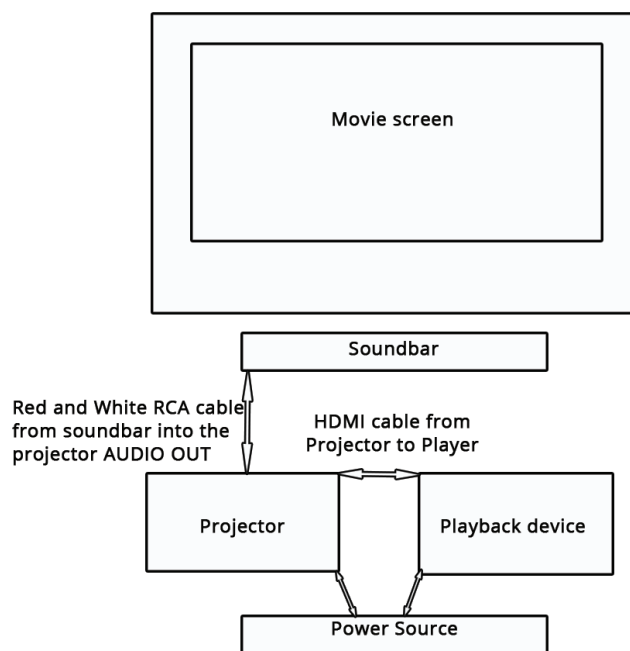

1. Place Soundbar on the small table at the front and centre of your screen
2. Connect red and white RCA cable at the back of the soundbar to the Audio Output on the side of the projector
3. Connect the soundbar power cable to your power outlet

Turn everything on:

- ▶ power boards,
- ▶ soundbar,
- ▶ projector,
- ▶ Playback device (DVD player, laptop, etc)

and JUST HIT PLAY!
